STACK

Languages
TypeScript · JavaScript · PHP

Frameworks
Laravel · Node.js · NestJS · Express · React · Next.js · Redux

Styling
Tailwind · Radix UI · Chakra UI

Data
PostgreSQL · MongoDB · Redis

Infra
AWS (Lambda, EC2, S3, Serverless) · Docker

Enterprise
SAP integration · .NET Core APIs

Testing
Jest · RTL · Integration · E2E

Practices
Agile · CI/CD · Git · RFCs · Postmortems

LANGUAGES

Portuguese Native
English C1
Spanish Working

Full-Stack Engineer with 5+ years building scalable web applications and APIs across the Laravel/PHP, Node.js, and React/Next.js ecosystems. Strong in TypeScript, PostgreSQL, AWS, and Docker, with a solid testing culture (Jest, RTL, integration & E2E). Additional background as an SAP consultant, bridging enterprise systems with modern web stacks. Remote-first and agile — I mentor peers and ship production software end to end.

EXPERIENCE

- SAP & Web Consultant · Lab2dev** CONTRACT 2025 – Now
 - Deliver SAP consulting alongside custom web development, integrating enterprise SAP processes with modern web applications.
 - Build full-stack solutions with Laravel, Node.js, React, and Next.js for business-critical workflows.
 - Act as the technical bridge between enterprise SAP systems and web tooling, turning business requirements into shipped features.
- Full-Stack Developer · Viveo** Jul 2023 – Now
 - Built and maintained cloud-integrated systems using Node.js (AWS Lambda) and MongoDB.
 - Designed RESTful APIs and automated synchronization between local and cloud systems.
 - Introduced Docker environments for consistent development and deployment across the team.
 - Mentored junior developers and improved overall team productivity.
- Full-Stack Developer · Yandeh** CONTRACT Nov 2021 – May 2023
 - Ported a legacy Vue 2 application to React with Next.js, modernizing a growing e-commerce platform.
 - Built front-end features with React, Redux, and Tailwind; maintained internal AWS Lambda APIs in Node.js.
 - Worked across the stack with LoopBack, Express, and NestJS, adopting AWS services (Lambda, EC2, S3, Serverless).
 - Implemented unit and integration tests (Jest) and improved CI/CD pipelines in a fast-moving startup.
- Custom Solutions Consultant III · Capgemini** CONTRACT Jun 2021 – Sep 2022
 - Created and maintained enterprise-grade web applications using React, Redux, and Context API.
 - Wrote automated tests with Jest and RTL; enforced code quality and security via SonarQube.
 - Maintained .NET Core APIs and collaborated cross-functionally using IBM Rational Team Concert.
 - Contributed to RFC-style documentation and postmortem analyses.
- Web Developer I · 3E Engenharia** Sep 2020 – Jun 2021
 - Developed and maintained web applications supporting energy-efficiency engineering services.

EDUCATION

- B.Sc. in Computer Science**
Federal University of Mato Grosso do Sul (UFMS)
Expected Jun 2026
- Technical Diploma, Information Technology**
Federal Institute of Mato Grosso do Sul (IFMS)
Completed 2019
